

The soul of a city in a single print

Martin Schwartz

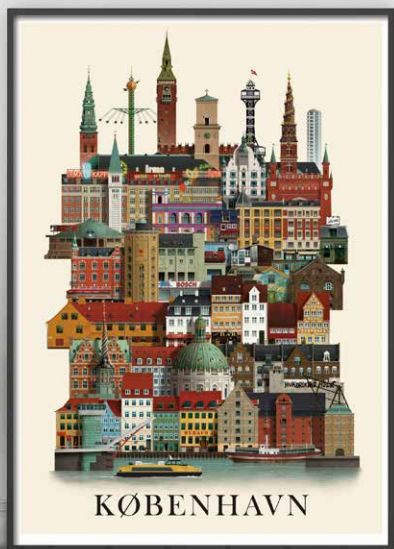

City posters by Martin Schwartz

Danish illustrator Martin Schwartz is renowned for his detailed city posters.

Every poster is the result of a long research process followed by three months of hard illustration work - with no compromises along the way.

All buildings are carefully selected and illustrated down to the finest detail, as only then is it possible to depict the true DNA of a city. The composition and tone of color give the posters a classic and timeless design - with a bit of a nostalgic touch.

The poster

Every building in the poster is done with great respect for all the architectural details.

This brings a very authentic atmosphere to the poster.
